DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Daberko et al (US005839108A) in view of Haimi-Cohen (US006233320B1).

Per claim 1, Daberko discloses a computer –readable medium containing a data structure for storing voice signals comprise a voice list containing an entry for each of one or more voice signal, each entry comprising a single string of data records wherein each data record has a file pointer to the next record, the last record having an end of file marker (see column 6 and lines 15-30), each record corresponding to at least one time stamp of the voice signals for use in restoring the data structure to a media understandable by a user (see column 7 and lines 60-64). Daberko doesn't teach that the storage medium is for a phone conversation. Haimi-Cohen discloses a mobile set having a record/play back phone conversation function. It would have been obvious to one ordinary skill in the art at the time the invention was made to combine the teaching of Haimi-Cohen such that a mixture size of memory storage medium would be used for a size-limited mobile terminal.

Per claim 2 and 3, Daberko further teaches the data structure further comprises non-voice signals such as music data in which is computer readable files (see abstract).

Art Unit: 2682

Per claim 4, Dabeko further teaches that the data structure is stored in a flesh memory medium (see abstract).
